Course: Ios Development
Lecturer:
Name: Bui Thanh Huy

For assignment 2, i choose to do Sicbo. Sicbo is famous game not only for Chinese but also in Vietnam. At the moment, you can find many website or live stream Sicbo on multiple social media platform. Sicbo is basic, simple, easy to understand the game's rule and also fun. In order to play the game, first you need to bet amount of money on the betting table. There are multiple options or scenarios for you to bet. For example, if you insert your chips on the odd, three dices are rolled and if the sum of the three dices are odd then you get an amount of money depends on the easy or hard mod of the game. If you insert chips on dice one, if there are any one of three dice are dice number 1 then you win. Losing all your moneys means you lose the game.
Main Feature:
- Main Menu
- Game View
- How to play
- Background music
- Effect sounds
- UI for Iphone 13 Pro Max

Second Feature:
- You can insert easy or hard mode in game to change the ratio of winning bet

- Link Github:
- https://github.com/AaronBui-gif/SicBo-Casino/tree/main
- Morover, you can also find video in the submit folder
